EDUCATION

Arizona State University

Bachelor of Science in Computer Science

Tempe, AZ

Sept. 2023 – Expected Jun 2027

EXPERIENCE

Newfound Systems

Software Engineering Intern

Remote

Dec. 2023 – Jan. 2024

- Developed backend services using Spring Boot to handle invoice processing tasks.
- Implemented functionality to import invoices, extract waybill numbers, rename invoices, and export them.
- Wrote and optimized code to reformat invoices for compatibility with downstream systems.
- Reduced processing time and improved system efficiency by automating invoice handling tasks.

PROJECTS

Lang-X AI

Tech Stack: Node.js, JavaScript, OpenAI API

Solo Project

Nov. 2024 – Jan. 2025

- Created a programming language with functional programming principles and integrated prompt engineering to generate code in multiple languages.
- Implemented syntax, parser, and tokenizer for the language.
- GitHub: lang-x-ai

NFT Gallery

Tech Stack: React, Next.js, Thirdweb, wagmi

Solo Project

Sept. 2024 – Nov. 2024

- Built an application where users can connect their wallets and view their NFTs.
- Deployed at: Vercel

SKILLS

Languages: JavaScript, Solidity, Java, Python, C

Frameworks/Technologies: Node.js, Hardhat, React, Next.js, Arduino

Tools: Git, MongoDB, Wagmi, Thirdweb

HONORS & AWARDS

Fall 2023 UGES Dean's List

Dec 2023

Ira A. Fulton Schools of Engineering, Arizona State University

- Recognition for achieving academic excellence by completing at least 12 credit hours with a GPA of 3.5 or higher during Fall 2023.
